RESTRICTION

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, the Applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-18 and 25-39, drawn to a method and apparatus for estimating a road surface condition;

Group II, claims 19-21, drawn to an apparatus for estimating the condition of a tire based on a tire pressure. Furthermore, said apparatus does not require the condition of the road surface to be taken into account; and

Art Unit: 2855

Group III, claims 22-24, drawn to an apparatus for estimating the condition of a tire based on a revolution speed and a vibration level. Furthermore, said apparatus does not require the tire air pressure or the condition of the road surface to be taken into account.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features because the particulars of each group is not required by the other groups. Therefore, the Examiner would be burdened by the searches of three separate inventive concepts.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
